Marzik now offers MoreStor Vault solution on their General Services Administration (GSA) schedule

A high availability online, offsite secure backup and recovery solution

Middleboro, MA – March 23, 2007 – Marzik announced today that the MoreStor Vault remote online backup & recovery vaulting solution from More Solutions Inc. has been approved and now available on their General Services Administration (GSA) schedule. The selection of MoreStor Vault will further strengthen Marzik's strong data storage offerings to the federal sector that improve data backup & recovery efficiencies and reliability.

MoreStor Vault is a leading online backup and recovery service which protects valuable data and information. An organization's business critical data is compressed, encrypted and then stored offsite remotely in a secure data center. Backups are fully automated and do not require any human intervention. MoreStor Vault is a monthly service that does not require any initial capital expenditure and integrates seamlessly into a customer's existing infrastructure.

Today's issues that drive the need for MoreStor Vault's efficient, reliable and cost effective backup and recovery solution are similar regardless of the industry:

- Disaster Recovery
- Backup Lifecycle Management
- Bare Metal Restore
- Government Compliance
- Continuous Data Protection
- Rapid Recovery and Reliability
- Hot Database and Email Backup
- Remote Site Backup & Recovery
- Limited IT Resources

"Marzik and the More team have been partners in the Backup and Recovery industry for over a decade." said Brad Willcockson, President of Marzik. "We see the MoreStor Vault solution as a fantastic data protection solution for government agencies with many offices and diverse infrastructures throughout the country and the world."

"The Marzik team of seasoned high quality storage integrators; to the federal government, will provide exceptional knowledge and expertise to their MoreStor Vault prospects and end users" said Tom Gelson, President of More Group Inc. "Data has become more essential than ever in our government agencies, just like in the commercial sector. It does not matter how big or small the agencies or department, if data should become lost or inaccessible, irreparable damage would occur. Providing the GSA users with the ability to source the MoreStor Vault will ensure that their data will be automatically and completely protected at an off-site location and away from harms way."

About Marzik

Since 1997 Marzik has been designing, installing and supporting data storage and security solutions for its customers. Numerous federal agencies and system integrators trust Marzik to develop storage and security solutions that protect their data and ensure their missions are successful. Marzik and its team of partners deliver a comprehensive offering of services to include design, analysis, planning, implementation, ongoing technical support and maintenance. This support structure is in place because Marzik understands the demands of their customers 24x7 data center operations and its resultant challenges. Marzik is located in Lanham, Maryland.
