

# LiveFire DR™/CV

LiveFire DR/CV provides a test and audit program for your DR plan utilizing your CommVault Disaster Recovery Backup. This program will help insure that your critical business systems are properly safeguarded from any type of disaster.

## Questions from your auditor:

- How often are you able to test the DR process?
- Are the steps required to perform this recovery well documented?
- Are you comfortable entering your disaster recovery provider's facility (e.g. SunGard) and recovering your CommVault server for the first time, in a timely manner (one 8 hour shot for all testing)?
- Can you take the time in your own environment to simulate a recovery?
- Do you have the needed infrastructure and expertise in your data center to facilitate a recovery test?
- Are you sending the necessary information off-site to recover your CommVault Commserve?

## LiveFire DR answers the auditor's questions by:

- ✓ Simulating a recovery of your CommVault environment in MGI's interoperability test lab
- ✓ Providing an MGI certified CommVault consultant/engineer to assist and help validate your DR recovery plan
- ✓ Supplying documentation and reports on your DR process and LiveFire DR test results
- ✓ Insuring that before you perform a disaster recovery test or declare a disaster that you have already tested and audited the procedure of recovering your CommVault environment

## MGI LiveFire DR will:

- ✓ Match CommVault server (CommServe) and MediaAgent requirements close to your current environment
- ✓ Load the CommVault Server Code on a DR System
- ✓ Run the DR tool
- ✓ Populate the CommVault Server Databases
- ✓ Review customized server disaster recovery plan
- ✓ Provide inventory of machine information required to recover the server and its clients
- ✓ Review recovery of client data procedures
- ✓ Validate Aux Copy procedure
- ✓ Validate retention requirements and rotation plan
- ✓ Validate Best Practices for DR Backup
- ✓ Estimate recovery time of CommServe and MediaAgents and provide recommendations for meeting SLAs

For more information or to schedule your LiveFire DR/CV test, please call More Group Inc at 800-952-3215 or e-mail us at [sales@moregroupinc.com](mailto:sales@moregroupinc.com).
